## Jabroni Files: Part 1

High Quality Meme

Greetings Friends,

So following the shitshow this week already and watching goons burn is fun, I bring to you part 1 of a series of threads I plan to release over the coming days/weeks of the Jabroni Files. For those who are unaware, a former goon IT director scopehone(AKA. scopeh) recently was airlocked and kicked from goonswarm for being AFK from game but maintained/created projects such as Webway (Wormhole Tool), Blackhand Agent Tracking and Recon Tools also did some improvements to GICE (Goonswarm Immigration and Customs Enforcement).Scopeh made a post about some of the information on why he was kicked but going back to the thread it looks like its been deleted however the gdrive of his previous release still are live as well as one of his previous posts "GSF intel tools"

Part 1: [https://www.reddit.com/r/Eve/comments/16u4223/its\\_been\\_a\\_fun\\_ride/](https://www.reddit.com/r/Eve/comments/16u4223/its_been_a_fun_ride/)Part 2: [https://www.reddit.com/r/Eve/comments/16uzm3n/gsf\\_intel\\_tools/](https://www.reddit.com/r/Eve/comments/16uzm3n/gsf_intel_tools/)Other Leaks from Scopeh: [https://drive.google.com/drive/folders/1M\\_eWPI102QUi9p-LwQrqL\\_WexrxgKjhQ?usp=drive\\_link](https://drive.google.com/drive/folders/1M_eWPI102QUi9p-LwQrqL_WexrxgKjhQ?usp=drive_link)

So back to the story, Upon a few hours after being kicked scopeh reached out to myself and a FRT member who has requested to named codename: blue\_frog and we got shown a 1h+ VIP tour of goons recon tool, this includes but not limited to Tracking of public contracts, Unique Hash Tracking of JF's/Capitals/Titans/Supercarriers, NPC Kills By Region, Total Moon Value Of a Region by the 1000's upon 1000's of moons they have scanned/stolen from other alliances recon sigs, Coalition Dashboard that pulled data from adashboard, character reporting, reports/observations made from recon agents, Recon Tool User Accounts, Database backups and sooo much more.One of the interesting things to come from this VIP show i can show you

all the character names on the list but of course they may be more not listed as this data set for augswarm was from July 2022. In the screenshot you can see the number of logins, Offline/Online showing if someone is logged into the account so no one would kick the other dude off if they were logged in and the shiptype they are in and region/const/sys.

And probably the biggest leak to follow this is blackhand's entire database of over 600+ spy agents and handlers within goons and some from init, while in and of itself isn't juicy but these clowns were nice enough to give us rough dates of when a character was placed into an alliance and rough date a user was added to a sig/role which i shall dive more into over the coming days.... For now here's some screenshots of just a few random pages 😊

Scopeh has released all his projects he owns to github for people to fork/download and play around with <https://github.com/scopehs>

Until next time, keep your friends close, your spi accounts closer, and your leaks juicier. Over and out, space cowboys! 🚀😊
